CERTIFICATIONS

- Google Cloud Cybersecurity Certificate →
- Google Cloud Computing Foundation

EDUCATION

B.Sc. in Computer Science – Univesp, 2027

WORK EXPERIENCE

Infrastructure Analyst - Cria<dig> - Apr/2024 – Present- Current- Remote

- Implementation of projects on the AWS platform, configuring services such as Amazon EC2, Amazon WorkMail, Amazon SES, Route 53, DNS, and issuing HTTPS certificates.
- Deploying updates for projects developed in .Net, ensuring system integrity and performance in production and test environments.
- Monitoring Cloudflare metrics, including analyzing access IPs, detecting suspicious activities, and blocking malicious IPs.
- Collaborating with internal teams to enhance site security and performance, resulting in an 80% reduction in incident response time and actions against intrusion attempts.

Technologies: ASP.NET Core 6, AWS, SQL Server, CloudFlare, Scrum

Full Stack Developer - Didox Business Technology (Contract)- Nov/2023 - Dec/2023 - Remote

- Development of the layout using React and Next.js technologies, applying best design practices and ensuring an enhanced user experience.
- Efficient integration with the API through the utilization of Swagger, facilitating communication between the frontend and backend of the application.
- Close collaboration with the backend team, implementing integrations with the backend developed in C# and the .NET framework to ensure seamless synchronization between system layers.

Technologies: ASP.NET Core Web API, Next.js, React.js, Scrum, Kanban

Junior-Level .NET Developer – Wipro - May/2022 – Jan/2023 - Remote

- Played a key role in overseeing .sh scripts that orchestrated critical database operations. Utilized MobaXterm to ensure efficient and secure access.
- Took responsibility for maintaining an application built on C# ASP .NET Framework Version 4.0. Demonstrated dedication to its upkeep and enhancement, ensuring attention to detail at every stage.
- Actively contributed to our collective knowledge base (Confluence), keeping it updated and relevant through the Wiki content management system.
- Led the coordination of test scripts and ensured the flawless operation of the application. Each functionality was thoroughly evaluated following implementations.
- Proactively addressed vulnerabilities identified by the Checkmarx system, providing precise analyses and effective solutions to safeguard system integrity.
- Reporting meetings were conducted entirely in English.
- **Technologies:** C#, ASP.NET Core, Oracle, Bitbucket, Checkmarx, Scrum

SKILLS

- **Back-end:** C#, ASP.NET Core, .NET 6/7, RESTful APIs, Entity Framework
- **Front-end:** JavaScript, HTML, CSS
- **Database:** SQL Server, MongoDB, PostgreSQL, Amazon DynamoDB
- **Cloud:** AWS, Google Cloud Platform
